*Any additional critical/key locations included in the scope of accreditation are appended to this listing.*

**Accreditation Standards:**

CAN-P-3G (ISO/IEC Guide 65:1996)

CAN-P-1500M

IAF GD 5:2006

**Certification Mark:**

**Product Certification System Type:**

The product certification system operated by this organization most closely resembles that described by ISO/IEC Guide 67, *Conformity assessment — Fundamentals of product certification*, System 5. It includes the evaluation of samples requested by the certification body, determination of characteristics by testing or assessment, initial assessment of the production process or the quality system, as applicable, evaluation of the test and assessment reports, license, on-going surveillance by testing or inspection of samples from the factory or the open market, or both depending on the product type, as well as on-going surveillance of the production process or quality system or both.
