Product Certification Scheme:

ISO/IEC 17067, Conformity assessment - Fundamentals of product certification and guidelines for product certification schemes, *scheme type 1b* most closely resembles the product certification scheme operated by this organization. This scheme type involves the certification of a whole batch of products, following selection and determination as specified in the scheme. The proportion to be tested, which can include testing of all the units in the batch (100% testing), would be based, for example, on the homogeneity of the items in the batch and the application of a sampling plan, where appropriate. If the outcome of the determination, review and decision is positive, all items in the batch may be described as certified and may have a mark of conformity affixed, if that is included in the scheme.

ISO/IEC 17067, Conformity assessment - Fundamentals of product certification and guidelines for product certification schemes, *scheme type 3* most closely resembles the product certification scheme operated by this organization. The surveillance part of this scheme involves periodically taking samples of the product from the point of production and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfil the specified requirements. The surveillance includes periodic assessment of the production process. This scheme does not provide any indication of the impact the distribution channel plays on conformity. When serious nonconformities are found, the opportunity may exist to resolve them before widespread market distribution occurs.

Scope of Accreditation:

The scope of accreditation for the above-mentioned legal entity limits the use of the certification mark shown, to products that meet standards classified by the following international classification coding:

ICS No.	Title	Purpose
11.040	Medical Equipment	Electrical Safety
11.040.01	Medical equipment in general	Electrical Safety
11.040.10	Anaesthetic, respiratory and reanimation equipment	Electrical Safety
11.040.20	Transfusion, infusion and injection equipment	Electrical Safety
11.040.30	Surgical instruments and materials	Electrical Safety

ICS No.	Title	Purpose
11.040.50	Radiographic equipment	Electrical Safety
11.040.55	Diagnostic equipment	Electrical Safety
11.040.60	Therapy equipment	Electrical Safety
11.040.99	Other medical equipment	Electrical Safety
11.180.15	Aids for deaf and hearing-impaired people	Electrical Safety
13.030.40	Installations and equipment for waste disposal and treatment	Electrical Safety
13.110	Safety of Machinery	Performance, Safety
13.220.20	Fire protection	Electrical Safety
13.220.40	Ignitability and burning behavior of materials and products	Electrical Safety
13.310	Protection against crime	Electrical Safety
13.320	Alarm and warning systems	Electrical Safety
17.140.50	Electroacoustics	Electrical Safety
19.080	Electrical and electronic testing	Electrical Safety
21.180	Housings, enclosures, other machine parts	Electrical Safety
23.040.60	Flanges, couplings and joints	Performance, Safety
23.040.70	Hoses and hose assemblies	Performance, Safety
23.060	Valves	Performance, Safety

ISO/IEC 17067, Conformity assessment - Fundamentals of product certification and guidelines for product certification schemes, *scheme type 4* most closely resembles the product certification scheme operated by this organization. The surveillance part of this scheme allows for the choice between periodically taking samples of the product from the point of production, or from the market, or from both, and subjecting them to determination activities to check that

items produced subsequent to the initial attestation fulfil the specified requirements. The surveillance includes periodic assessment of the production process. This scheme can both indicate the impact of the distribution channel on conformity and provide a pre-market mechanism to identify and resolve serious nonconformities. Significant duplication of effort may take place for those products whose conformity is not affected during the distribution process.

Scope of Accreditation:

The scope of accreditation for the above-mentioned legal entity limits the use of the certification mark shown, to products that meet standards classified by the following international classification coding:

ICS No.	Title	Purpose
23.120	Ventilators. Fans. Air-conditioners	Electrical Safety, Energy Efficiency and performance
27.080	Heat Pumps	Electrical Safety, Energy Efficiency and performance
29.140	Lamps in general	Energy Efficiency and Performance

91.140.30	Ventilation and air-conditioning systems	Electrical Safety, Energy Efficiency and Performance
91.140.65	Water Heating Equipment	Electrical Safety, Energy Efficiency and Performance

Additional Regulatory Requirements:

Accreditation for the purpose of Notified Body activity, pursuant to the Conformity Assessment protocol in the Canada-European Union Comprehensive Economic & Trade Agreement (CETA).

Note: SCC takes into account EA 02/17.

Directive/Regulation:

Equipment and protective systems intended for use in potentially explosive atmospheres (ATEX) 2014/34/EU.

Conformity assessment modules:

- EU-type Examination (Module B)
- Conformity to type based on quality assurance of the production process (Module D)
- Conformity to type based on product verification (Module F)
- Conformity to type based on product quality assurance (Module E)
- Conformity based on unit verification (Module G)
